

Itching Burning Scaly **Blotchy Humors**

Instantly Relieved and Speedily Cured by

aticura

The Stohing and burning I suffered in my feet and limbs for three years were terrible. At night they were worse and would keep me awake a per part of the night. I consulted doctor after doctor, as I was traveling on the road most of my time, also one of our city doctors. None of the ctors knew what the trouble was. I got a lot of the different samples of the medicines I had been using. I found them of so many different kinds that I concluded I would have to go to a Cincinnati hospital before I would get relief. I had frequently been urged to try CUTICURA REMEDIES, but I had no faith in them. My wife finally prevailed upon me to try them. Presto! What a change! I am now cured, and it is a permanent cure. I Seel like kicking some doctor or myself for suffering three years when I could have used CUTICURA remedies. H. JENKINS, Middleboro, Ky.

neists of Cursuma Soar (25c.), to cleanse the skin of crusts and scales and soften thickened cuticle, Cursuma Cintment (50c.), to instantly allay itching, irritation, a inflammation, and soothe and heal, and Cursuma Resouvers (50c.), to cool and anse the blood. A Sixum Ser is often sufficient to cure the most torturing, discring skin, scalp, and blood humors, makes, and irritations, with loss of hair, when yeldens, hospitals, and all else fail. Sold throughout the world. Potter Davo Danse. Conr., Sole Props., Boston. "How to Cure Itching Humors," free.

Millions of Women Use Cuticura Soap

Ententively for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruff, and the stopping of failing hair, for softening, whitening, and beating red, rough, and sore hands, in the form of baths for annoying irritations, influentations, and change, or too free or offensive perspiration, in the form of washes for allocative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially mothers, and for all the purposes of the toilet, bath, and murstry. He amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. Ourscura Scar combines delicate emallient properties derived from Currouna, the great skin cure, with the purpost of cleaning ingredients and the most refreshing of flower odors. No other medicated or toilet scap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet scap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and sursery. Thus it combines in One Scar at One France, viz., Twentry rays Castra, the austrakin and complexion scap, and the ment toilet and murs baby seep in the world.

GREAT WORK OF THE FISH COMMISSION

Its Busiest Season Is Just Beginning and Fine Results Are Promised.

SUPPLY LARGELY INCREASED

Five Carloads of Young Fish Are Now in the West, Being Transplanted-Shad, Lobsters and Oysters.

REPUBLIC SPECIAL

Washington, D. C., April 13.-The United States Fish Commission is just now at one of its busiest seasons. It is gathering fish eggs, and distributing both eggs and fish all over the country. Five carloads of fish are just now in the West, being transplanted in various streams.

In the East, the commission is devoting most of its attention to shad. "Planked shad for the poor man" seems to be its motto: and it is observing it so well that the poor man may soon be called upon to do more than furnish the plank.

"The increase in the catch of shad in one year represents more than the total cost of propagation for twenty-five years," is the statement made by United States Fish Commissioner George M. Bowers.

In a few days the steamer Fish Hawk will enter the Delaware River and begin the collection of shad eggs and their distribution to the hatcheries.

This activity promises to be accompanied by one drawback. Shad roe is likely to be a scarce article of food for a time. But the eggs are being put to a much better use, and soon there will be enough shad to give forth again the normal supply of

What Was Done Last Year. Commissioner Bowers's report for the last fiscal year shows that there were dis-tributed throughout the United States during that time 1,164,336,754 fish of different kinds. This was an increase over the previous year of about 100,000,000, and it is calculated that a corresponding increase will be shown this year, so that the total number of fish distributed will amount to over a billion and a quarter. Commissioner Bowers is endeavoring to double the catch of shad, white fish, cod, lake trout, brook trout, rainbow trout,

COMMISSIONER BOWERS.

and, in short, all varieties of edible The Commissioner has undertaken the most difficult task yet presented in the history of the commission, and that is the salvation of the lobster fishery. Lovers of broiled lobster, lobster as la Newberg, lobster salad, and other preparations of that lucious crustacean have viewed with that lucious crustacean have viewed with terror the upward trend of prices on the

menu card.

For the past three years the Fish Commission has been making strenuous efforts to increase the output of lobster fry. State fish commissions throughout new England have co-operated, but the scarcity of lobsters and the difficulty of gatting egg lobsters from the fishermen have made it almost impossible to increase the output. Last fiscal year less than 5,000 egg lobsters were secured north of Cape Cod. These yielded over \$5,000,000 eggs, from which were hatched \$5,500,000 fry. The commission will not be satisfied until this output is at least quadrupled. Then in the course of a few years brolled lobster may again be within the reach of the modest pocket-book.

Assisting Oyster Industry.

Assisting Oyster Industry.

The biological inquiries of the commission are extentive and embrace investigations and experiments among fish, lobsters, clams and cysters. One result of experiments has been practical assistance to the eyster industry. Oysters have been fattened in inclosed waters by the increasing production of their natural food, and the public before many years will reap the benefit of the commission's work.

Much of the work of the commission consists in transferring and transplanting fish, cysters and lobsters from one part of the country to the other. One of the first experiments in this line was the introduction on the Pacific Coast of the Eastern shad. There was a time, not very many years ago, when shad sold for it seeds in Ban Francisco, and other Pacific Coast towns. Last year this fish was so plentiful in the Columbia River and other streams emptying into the Pacific that they were caught and used for fertilizer on the land. The presence of the shad has in ne way interfered with the salmon.

From the Middle West, Minnesota and the Mississippi Valley, there has been brought to the East within recent years a delicious table fish known as the way rapid and this year the distribution of exappie fry will be se extensive as to insure the Real and that stream below the Great Falls, is now so well stocked with them that 100,000 pounds of this first-class game and food fish were sold in the Washington market last year.

The small-mouth black bass for which the Upper Potomac has long been famous and which is regarded by sportumen as one of the gamest fishes south of the Lake Regions, is becoming very popular. The commission is pushing its propagation with all possible speed and one of the principal stations for the work is in Trans.

The Swern, the head of the commission come from well sorts and conditions of men, from sportsmen's associations, from individuals and from firms, but no matter how obscure the citizen may be, if this commission thas a firm of the propagation of fishes. "The southers

SAILORS TATT@OED

American Man-o'-Warsmen Commemorate Incidents of Our Affair With Spain.

OTHER INTERESTING MARKS.

One Man's Body Circled by Enormous Python-Many Signs of the Oross and Portraits of Sweethearts.

REPUBLIC SPECIAL

Philadelphia, Pa., April 13.—It has long arm. The idea is one of marine tradition, the origin of which is lost somewhere in the dark ages.

Since the war with Spain the American marine has appeared with a number of of those stirring times. The ships that come up the Delaware to this city often bring sailors with arms and hands so tattooed that there is little of unmarked skin visable. A sailor from the battleship Indians, who was recently here, might enter a museum as a tattoced man, so many and curious are the designs worked out in ink on his chest, back, neck, hands and arms.

Stars, flags, coats of arms, full-rigged ships, anchors and liberty heads are the most popular tattoc marks of the American sallon. Red hearts, pictures of some sweetheart and her name are frequently tattoced on a sallor's arm. These testimonials of affection have figured prominently in breach-of-promise suits in the courts, and have also proved rather embarrassing, when, as is sometimes happens, the sallor marries another girl.

When the tars on the battleship Indiana

strip to bathe, some striking and interesting pictures are seen on them. Some men are literally covered with tattoo marks and are veritable human picture galeries. On one old sait a python is pictured so true to life that it seems about to crunch the man to death. Its menacing head reasts on the sailor's breast and its poverful folds tightly circle his body to the ankles in such a orcle his body to the ankies in such a realistic manner as to fill the unsophisticated observer with unspeakable horror.

Another of the crew is a hero of San Juan. On his breast is tattooed a spread eagle, whose wing tips extend to his armpits. Beneath the eagle are crossed cannon, and framed by wreaths on either side are seen

STATES WARSHIP. the pictured fortresses of San Juan.

The wreck of the Maine, and above it a woman with grasped dagger, signifying revenge, is a souvenir of the Spanish War that adorns the arm of another of our

A MUCH TATOORD BAILOR OF UNITED

a decent burial.

Tattoo marks are often invaluable in identifying mangled sailors. Some men bear an "apprentice mark" and all tattoes on a sailor are carefully recorded and described in his enlistment papers.

The fact that Uncle Sam's tar is of necessity physically treasure and the sailor are carefully treasure and the sailor are sailor and the sailor and the sailor and the sail sailor and the sailor and t

cessity physically strong, usually exception-ally shrewd and invariably of unquestioned courage verifies the familiar rhyme: "It is all very true you can beat a tattoe, but you can't beat a tattoed man."

STUDYING THE CARTER CASE. Attorney General Familiarizing

Himself With Details.

Washington, April 13.—Attorney General Knox has taken up the records in the case of Captain O. M. Carter, convicted of swindiling the Government of enormous sums of money, and will make a thorough study of the case.

The object is that Mr. Knox may acquaint himself thoroughly with the case so that any further prosecutions or suits may be intalligently inaugurated.

The Department of Justice has had an expert bank examiner going through every one of the Carter transactions.

This official has been at work two years, and, it is declared, that he knows where every penny of the stolen money has gone. He will confer with Attorney General Knox at intervals and upon his knowledge of the case may be based important prosecutions of persons who have heretofore been unknown in the transactions.

Mr. Johnson, the bank examiner, is working in conjunction with the United States Attorney of the Savannah district.

FRUIT CANNING PLANT BURNED Was Preparing for the Opening of

BABES DRUNK ON WHISKY. Found It While Mother Was Away -One Will Die.

New York, April 13.—Marie Serovita, 18 months old, is dying in alcoholic come at St. Mary's Hospital, Brooklyn.

She and her 5-year-old brother were left alone by their mother this morning in their apartment at No. 142 Stone. The tots went to the kitchen pantry.

Joseph climbed on a chair and found the bottle of whisky. Both youngsters drank freely of it, Marie fell on the floor unconscious, and this stopped Joseph from drinking an inordinate share. The youngsters drank almost a pint between them. REPUBLIC SPECIAL

SUBSTITUTE FOR MORPHINE. A Doctor Cures Himself and Offers

Free Assistance to Others.

Dr. O. S. Willington of Memphis, Tena. writes in the Medical Brief: "I have in my possession a treatment which is a specific in drug addictions, opium habituation, al-coholism, etc. I will take pleasure in furcoholism, etc. I will take pleasure in fur-nishing any person with the formula, by the use of which a number have been en-abled to cure themselves of oplumism, al-coholism and insomnia. I used morphis hy-podermically for ten years. Obtained a per-fect cure by this prescription."

MAKES WOMEN STRONG

lown City, lows, August 15, 1900.

My wife was sick for three years. We tried everything without relief and spent much money. Last winter I read one of your Almanacs. My wife tried the Wine of Cardui and four bottles cured her. She attended to all her household duties and loaded and unloaded hay. This medicine gave her strength. Formerly she was weak and could hardly get about but since she has been taking Wine of Cardui she feels stronger than when she was 20 years of age. I would we had heard of Wine of Cardui and Thedford's Black-Draught years ago. JOSEPH ALOIS EISENHAFER.

No woman has ever taken Wine of Cardul and not been benefited. Mrs. Eisenhafer had tried everything during her three years' sickness and had spent considerable money. She was weak and could hardly get about for three years before she took

WINE CARDU

Now after taking the Wine she can work with her husband in the hay field. That is hard work. but it is not as injurious to a woman's health as labor in stores, factories and offices where thousands of girls are closely confined year after year. With the aid of Wine of Cardul a woman

can do any reasonable work and enjoy good health. The health that Wine of Cardul brings makes a woman vigorous in body and mind. Freed from those terrible devastating pains a woman grows well and strong naturally. Wine of Cardul regulates the disordered menstruation and cures leucorrhoea, falling of the womb and periodical pains in the head and back caused by standing or sitting a long time in the same position. Thedford's Black-Draught puts the bowels, stomach, liver, kidneys and blood in proper shape. Greatly increased strength and endurance is the natural result. Most cases are cured quickly. All druggists sell \$1.00 bottles of Wine of Cardui and 25 cent packages of Thedford's Black-Draught.
